Portfolio Projects

Lays Brand Website

- Role: UX/UI Designer — End-to-end prototype with micro-interactions and animated transitions.
- Contributions: Information architecture, responsive layouts, high-fidelity visual design, animated components, and interactive prototypes in Figma.
- Methods & outcomes: Conducted desk & competitor research; designed accessible navigation and CTA patterns; prototype demonstrates realistic user flows for product discovery and checkout.

Bank of India — Mobile app revamp

- Role: UX/UI Designer — Accessibility-focused revamp for core banking app (mobile).
- Contributions: accessibility audit (contrast, touch targets, screen reader labels), updated IA, streamlined onboarding and transaction flows, minimalist visual system, high-fidelity prototypes.
- Methods: applied WCAG guidelines, heuristic evaluation, moderated usability tests.

Landing Pages Collection — Web & UI showcase

- Role: Visual & Interaction Designer — Landing pages demonstrating component reuse, typographic systems, and conversion-focused UI.
- Contributions: pixel-accurate mockups, component library, responsive prototypes.
